

# How to connect and install YouView from BT

The user guide will help you through every stage of the install process and step to step install process.

Written By: Quenkrfixy

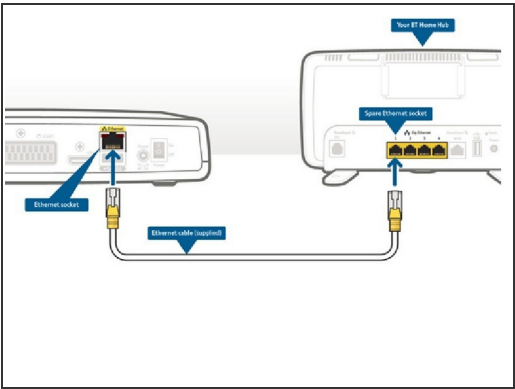

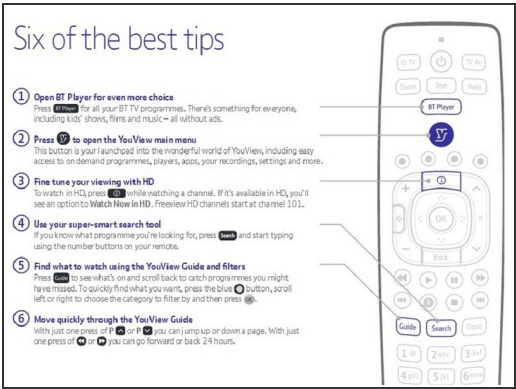

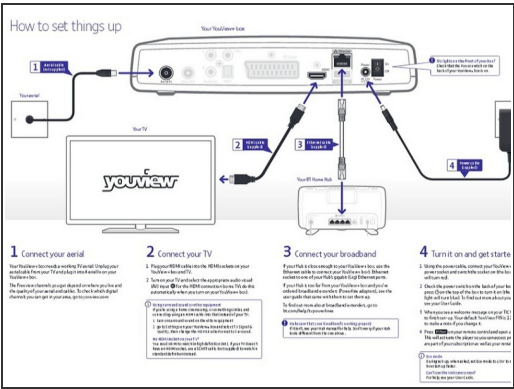

Step 1 — BT TV User Guide

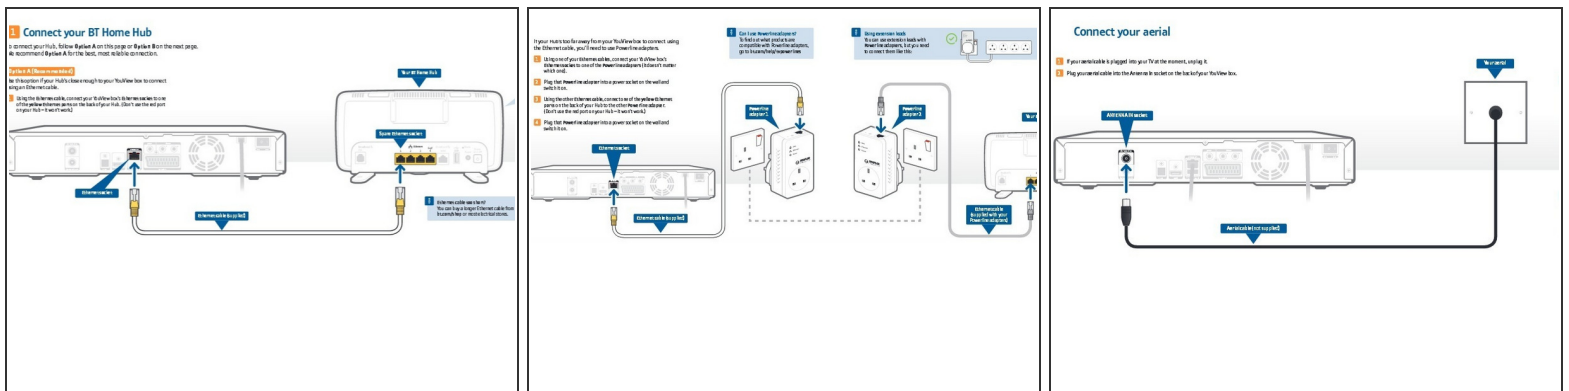

- Setting up your YouView box from BT

Step 2

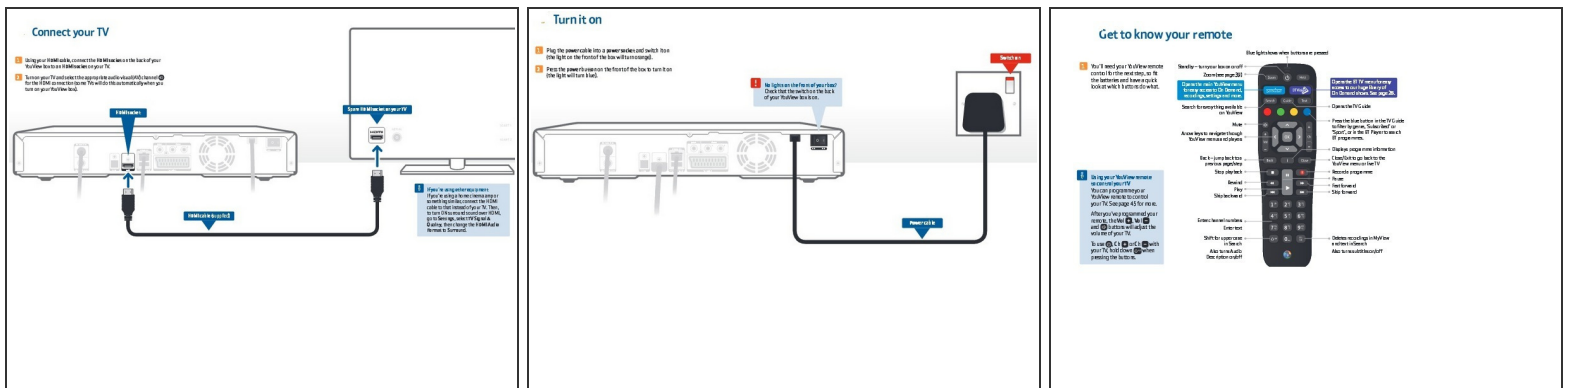

- Your YouView box will need to go near your TV, aerial (if you have one) and power socket.

## Step 3

- To connect your Hub, follow Option A on this page or Option B on the next page. We recommend Option A for the best, most reliable connection.

## Step 4 — Connect TV

- Using your HDMI cable, connect the HDMI socket on the back of your YouView box to an HDMI socket on your TV. 2 Turn on your TV and select the appropriate audio visual (AV) channel for the HDMI connection (some TVs will do this automatically when you turn on your YouView box).

The user guide will help you through every stage of the install process, which should take less than 15 minutes.
